

## Sketches

Microphone → LM393

Surface Transducer

Vibration sensor → DFR0052 Piezo

Photocells

Pressure Sensor

- Feedback loop between the voice microphone, surface transducer, and surface microphone.

- ~~Photocells~~ and Pressure sensors are the distorting elements of sound that is interfacing inside the software analysis (MAX MSP).

- Amplifier between the software output and the speaker (transducer).

- Adding a second one. [x2]

## GAME PLAY

- Making two of these playful objects that are connected affected by its environment.
- The design will be similar to joystick of a old school controller for games.

# Automated Voice Machine

PRESSURE  
SENSORS

LEFT: PITCH SELECTION (SPEED)  
MIDDLE: VOWEL SELECTION (SPEED)  
(VARIOUS FORMANTS)  
(FREQUENCY RATES)  
RIGHT: TIME INTERVAL  
BETWEEN GENERATED  
VOWEL (RAMPING BETWEEN  
FREQUENCIES) (SPEED)

BUTTONS

LEFT: ON/OFF SWITCH  
MIDDLE: ~~RANDOM~~ PITCH GENERATOR  
GENERATIVE (ON/OFF)  
RIGHT: ~~RANDOM~~ GENERATIVE VOWEL  
GENERATOR (ON/OFF)
